ELSEVIER

Journal of Membrane Science 118 (1996) 311–312

journal of MEMBRANE SCIENCE

Contents

An improved resistance model for gas permeation in composite membranes
G. He, X. Huang, R. Xu and B. Zhu (Dalian, PR China) 1
An investigation on the deformational properties of porous poly(vinyl chloride) and co-poly(butadiene-acrylonitrile) blend membranes
M.A. Islam (Rousse, Bulgaria), R.N. Stoicheva and A. Dimov (Bourgas, Bulgaria) 9
A simple analytical analysis of the performance of a two-membrane reactor
R.P. Omorjan, G.M. ĆIrić and M.N. Tekić (Novi Sad, Yugoslavia) 17
Novel solvent exchange cum immersion precipitation technique for the preparation of asymmetric polymeric membrane
R.C. Bindal, M.S. Hanra and B.M. Misra (Bombay, India) 23
The optical resolution of amino acids by plasma polymerized terpene membranes
S. Tone, T. Masawaki and K. Eguchi (Osaka, Japan) 31
Selective separation of flavonoids with a polyvinyl alcohol membrane
K. Yoshizuka, H. Ohta, K. Inoue (Saga, Japan), H. Kitazaki and M. Ishimaru (Ibaraki, Japan) 41
Effect of nonsolvent additives on the porosity and morphology of asymmetric TPX membranes
J.-Y. Lai, F.-C. Lin, C.-C. Wang and D.-M. Wang (Chung Li, Taiwan, ROC) 49
Selective recovery of palladium from a simulated industrial waste water by liquid surfactant membrane process
T. Kakoi, N. Horinouchi, M. Goto and F. Nakashio (Fukuoka, Japan) 63
Polymer design for pervaporation membranes: influence of the soft segment size of block copolymers (polyurethane-imides or polyureaimides) on their pervaporation features
A. Jonquières, D. Roizard and P. Lochon (Nancy, France) 73
Effect of dilution in the experimental dehydrogenation of cyclohexane in hybrid membrane reactors
F. Tiscareño-Lechuga (Celaya, Gto., México), C.G. Hill, Jr. and M.A. Anderson (Madison, WI, USA) 85
A batch membrane reactor for laboratory studies
L.A. Bernstein, C.M. Reo and C.R.F. Lund (Buffalo, NY, USA) 93
Rationalisation of the relationship between proton leakage and water flux through anion exchange membranes
B.J. Robbins, R.W. Field, S.T. Kolaczkowski and A.D. Lockett (Bath, UK) 101
Cross-flow ultrafiltration of hydrocarbon and biological solid mixed suspensions
S. Elmaleh and N. Ghaffor (Montpellier, France) 111

Short communications
Anion exchange membrane with viologen moiety as anion exchange groups and generation of photo-induced electrical potential from the membrane
T. Sata (Ube City, Japan) 121
Estimation of activation energy for permeation in pervaporation processes
X. Feng and R.Y.M. Huang (Waterloo, Ont., Canada) 127

Rapid communication
Relationship of rotational correlation time from EPR spectroscopy and protein–membrane interaction
S.F. Oppenheim, G.R. Buettner and V.G.J. Rodgers (Iowa City, IA, USA) 133

Meeting announcement 141
Meeting calendar 143

Concentration of native etheric oil aroma components by pervaporation
M. Mauz (Esslingen, Germany), K. Kimmerle (Sulzbach/Saar, Germany) and D.F. Hülser (Stuttgart, Germany) 145

Crack-free porous YSZ membrane via controlled synthesis of zirconia sol
T. Okubo, T. Takahashi, M. Sadakata and H. Nagamoto (Tokyo, Japan) 151
Preparation of thermostable amorphous Si-C-O membrane and its application to gas separation at elevated temperature
Z. Li, K. Kusakabe and S. Morooka (Fukuoka, Japan) 159
Pervaporation separation of ethylene glycol/water mixtures using crosslinked PVA/PES composite membranes. Part II. The swelling equilibrium model of the dense active layer in ethylene glycol/water mixtures
C. Fengrong and C. Hongfang (Tianjin, PR China) 169
Percolation permeability in styrene-methacrylic acid ionomers
H. Matsuyama, M. Teramoto and M. Tsuchiya (Kyoto, Japan) 177
Optimisation of an intermittent cross-flow filtration process of mineral suspensions
D. Si-Hassen, A. Ould-Dris, M.Y. Jaffrin and Y.K. Benkahla (Compiègne, France) 185
Asymmetric solute transport and solvent flux in dual-skinned hollow fiber membranes
P.J. Soltys (McGaw Park, IL, USA), N.J. Ofsthun (Round Lake, IL, USA) and A.L. Zydney (Newark, DE, USA) 199
Membrane mass transport coefficient for the recovery of Cr(VI) in hollow fiber extraction and back-extraction modules
I. Ortiz, B. Galán and A. Irabien (Santander, Spain) 213
Gas transport properties in thermally cured aromatic polyimide membranes
H. Kawakami, M. Mikawa and S. Nagaoka (Tokyo, Japan) 223
Crosslinked ion exchange membranes by radiation grafting of styrene/divinylbenzene into FEP films
B. Gupta, F.N. Büchi, G.G. Scherer (Villigen, Switzerland) and A. Chapiró (Thiais, France) 231
A new generation of track etched membranes for microfiltration and ultrafiltration. Part I. Preparation and characterisation
I.M. Yamazaki (Sao Paulo-SP, Brazil), R. Paterson (Glasgow, UK) and L.P. Geraldo (Sao Paulo-SP, Brazil) 239
Quantitative measurements of the concentration polarisation layer thickness in membrane filtration of oil–water emulsions using NMR micro-imaging
J.M. Pope (Brisbane, Qld, Australia), S. Yao and A.G. Fane (Sydney, NSW, Australia) 247
Protein recovery from bacterial cell debris using crossflow microfiltration with backpulsing
C.S. Parnham and R.H. Davis (Boulder, CO, USA) 259
Water profile determination in a running proton exchange membrane fuel cell using small-angle neutron scattering
R. Mosdale, G. Gebel and M. Pineri (Grenoble, France) 269
Shear controlled model of the ultrafiltration of soy suspensions
S.K. Sayed Razavi (Tabriz, Iran) and J.L. Harris (Melbourne, Australia) 279

Rapid communications
Corrections for analytical gas-permeation models for separation of binary gas mixtures using membrane modules
S.W. Smith, C.K. Hall, B.D. Freeman (Raleigh, NC, USA) and R. Rautenbach (Aachen, Germany) 289
Filtration of organic solutes on reverse osmosis membrane. Effect of counter-ions
G.T. Szabó, Gy. Móré and Y. Ramadan (Budapest, Hungary) 295
